The screenshot shows a VS Code editor with a file explorer on the left and a code editor on the right. The file explorer shows a project named 'RAG CHATBOT' with a 'datasets' folder containing 'obd_codes.csv'. The code editor displays the contents of 'obd_codes.csv', which is a table with columns: code, category, url, title, short_description, severity, can_drive, repair_cost_usd, repair_cost_inr, symptoms, causes, and how_to_fix. The table contains 21 rows of data for various OBD codes (P0000 to P0013).

The file explorer shows a project named 'RAG CHATBOT' with a 'datasets' folder containing 'obd_codes.json'. The code editor displays the contents of 'obd_codes.json', which is a JSON array of objects. Each object represents an OBD code with fields: code, category, url, title, short_description, severity, can_drive, repair_cost_usd, repair_cost_inr, symptoms, causes, and how_to_fix. The first object is for P0000.
